PROJECTS

Tourism Management System

- This project involved the creation of the website where the tourism details of a particular place can be stored and edited in the future.
- This project mainly involved the Data Base Management System concept, HTML and CSS for the website creation and JDBC connectivity.
- My Contribution for this project is to create the database and connect it with JDBC connectivity.

Sell Out - Ticket For All

- This is a ticket booking website where the customers can book tickets for the movies screening through our app.
- This website's frontend is built with HTML, CSS and the bit of a backend was done using JAVASCRIPT.
- The future ideas to develop this website are to making it a all purpose booking website instead of just movies and collection of reviews for Sell Out in the website itself.
